Alzheimer's Program September 24th

Plan to attend the upcoming program, "Alzheimer's – Know the 10 Signs Early Detection Matters" on Tuesday, September 24th in Concordia from 5:30-7:00 p.m. at the Concordia Senior Citizens Center, 109 West 7th Street. It will inform a person about the symptoms of Alzheimer's disease and other types of dementia.

Hayley Young, Outreach Specialist from the Alzheimer's Association in Topeka, will present this free program. Alzheimer's disease is not a normal part of aging. Hayley will share the 10 warning signs and symptoms to be aware. Early detection of Alzheimer's disease gives you a chance to begin drug therapy and to plan for the future. Hayley provides support to individuals with the disease, as well as family members, friends, and caregivers.

Please pre-register for the meeting by calling the Concordia Extension Office at 785-243-8185. Light refreshments will be provided. The program is sponsored by K-State Research & Extension River Valley District. For more information contact Deanna Turner at 785-632-5335 or e-mail dturner@ksu.edu. Sign up today!
