How to Control Bagworms

Have you ever noticed your windbreak covered in bagworms in the late summer months? If you know you have had bagworms in the past, now is the time of year to control them. RVED Horticulture Agent Kelsey Hatesohl will be talking about their life cycle and the best methods of control.

This program will be held on Tuesday, June 11th at 7:00pm, in the 4-H building on the NCK Free Fairgrounds. Participants are asked to RSVP by June 10th to the Washington Extension Office by calling 785-325-2121 or by emailing Kelsey Hatesohl at khatesohl@ksu.edu.
